MISSION

Our Company's mission is to design, manufacture and complete tools sets, workshop and container bodies that reliably help our Customers perform their daily tasks safely, efficiently and effectively.

Our products are used by different types of Users in various industries and sectors.

With them in mind, we prepare fully comprehensive and personalized solutions

PARTNERS AND SUPPLIERS

Over 25 years of presence in the market have allowed us to establish cooperation standards with partners and gain the trust of Customers. Thanks to internal procedures, as well as knowledge and experience, we build long-term business relationships with top producers in Europe and around the world.

We continue to develop and approach each new project with commitment. In our Company we adhere to the principle that the exceptional constant is change.

Matador has been in existence since 1900, and from the very beginning, it has been manufacturing hand tools. This solid German manufacturer's fastening tools that 'revolve around the screw' are recommended by professionals worldwide. MATADOR focuses on exclusive, premium tools. It is reliable, design-focused, efficient, an everyday hero. Be like MATADOR!

Modul-System is a Swedish company recognized as a leading European manufacturer of modular interior equipment for vehicles. The company invests in the dynamic development of its partner network. Continuous support enables the brand to boast a global and steadily expanding operational reach.

Since 1950, **Scobamat AG** has been investing in new technologies and developing innovative solutions that are successfully utilized worldwide. The company is renowned for producing highly durable, glass fiber-reinforced plastic (GRP) materials.

Kukko is a German manufacturer with over 100 years of experience. Thanks to the determination and forward-looking skills that distinguished its founders, Alfred Kleinbongartz and Emil Kaiser, from the beginning, the brand quickly became a pioneer in the field of non-destructive disassembly and assembly of machine parts and components.

Koken is a Japanese manufacturer whose operations began in 1946. By investing in development and continuously working to improve production processes, Koken sets new standards. The brand's sockets, socket wrenches, impact tools, and special tools are recognizable and enthusiastically chosen and used by professionals worldwide.

Compac is a Danish manufacturer that has been supplying workshop lifts and hydraulic presses since 1946. The brand consistently expands its product range to better meet changing customer needs. Compac solutions are used in workshops, automotive service centers, and manufacturing facilities worldwide.

ARPOL WORLDWIDE

• Germany

For many, the country is associated with VW, MAN, AUDI, BMW, and sausages (WURST). For us, it is primarily **the global capital of hand tools** – those of the highest durability, solidness, and reliability..

• Sweden

Ecology, beautiful landscapes, VOLVO, and... MODUL-SYSTEM. **Sweden is the country of origin of our vehicle interior solutions.** It's from Mulsjo that we receive the highest quality components for service vehicle installations.

• USA

In the United States, aircraft like the **C-130, F-16, F-35, as well as tanks like the ABRAMS and COUGAR vehicles** have been produced. Deliveries of this equipment for many years have contributed to ARPOL's continuous development in the market of modern technologies.

• Spain

Beaches, bulls and sangria are the inspiration for hard and strenuous work, it was the Spaniards who developed and patented **ANORTEC's tracked vehicle handling tools.**

• Switzerland

Unforgettable alpine views, beautiful waterfalls and lakes, and delicious chocolate inspired the engineering team to create a special combination of plastics from which the **SCOBAMAT® ground reinforcement mat was created.**

• Japan

The land of cherries and reliability. In ARPOL, Japan is associated with Toyota cars, which we frequently equip, as well as the **reliable impact sockets of the KOKEN brand.**

• Denmark

The capital of LEGO® bricks, this is where we learn from the Danes how to create documentation and ensure multi-year spare parts deliveries for our products. **In Denmark, our partner company COMPAC Hydraulic has its headquarters.**

We're just getting started...

In our company, **we follow the principle that the exceptional constant is change, therefore, with small steps we are constantly expanding our business.**

TECHNOLOGY

PROFESSIONAL TOOLS

Discover the wide range of high-quality tools that will ease your work, accelerate repairs, and enhance the quality of the service you provide to your Customers

Choose proven solutions!

PRODUCTS

ONLY TOP QUALITY

We offer only products of the highest quality, which means tools that stand out in the market for their reliability and durability. We collaborate with the best manufacturers in Europe and around the world, whose products have gained recognition among professionals.

The service vehicle installations we create are carried out comprehensively. The customer defines their needs and requirements. ARPOL, on the other hand, takes care of sourcing the vehicle, outfitting it with the necessary components and tools. After our intervention, you leave with a mobile service ready to work from the very first moment.

PRODUCTS

FOAM INSERTS

Proper tool storage is crucial in every industry. It minimizes the search for essential components during work and extends the lifespan of the tools you possess.

At ARPOL Narzędzia Profesjonalne Sp. z o.o., we care about the tools and accessories that Customers own. That's why we design, manufacture and supply professional tool completeness control systems that allow you to safely store and use the tools you own.

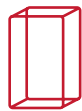

OUR PROJECTS

We can design the arrangement of any set of tools.

OUR PRODUCTION

Entrust us to make foam modules and eliminate the clutter in your tools sets forever.

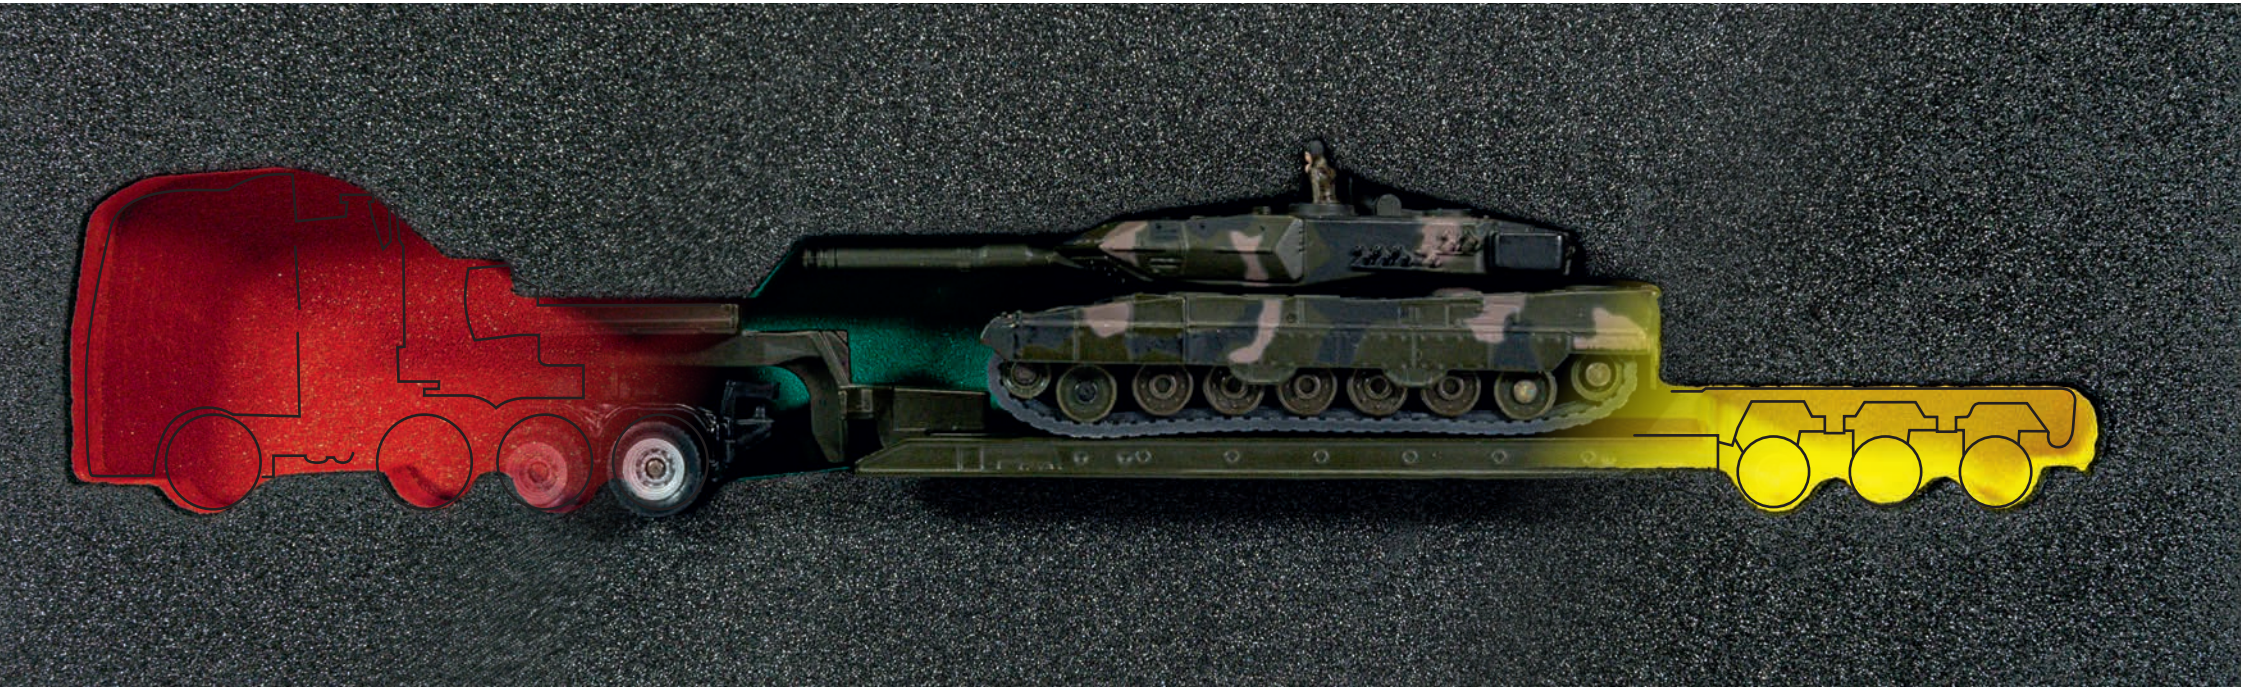

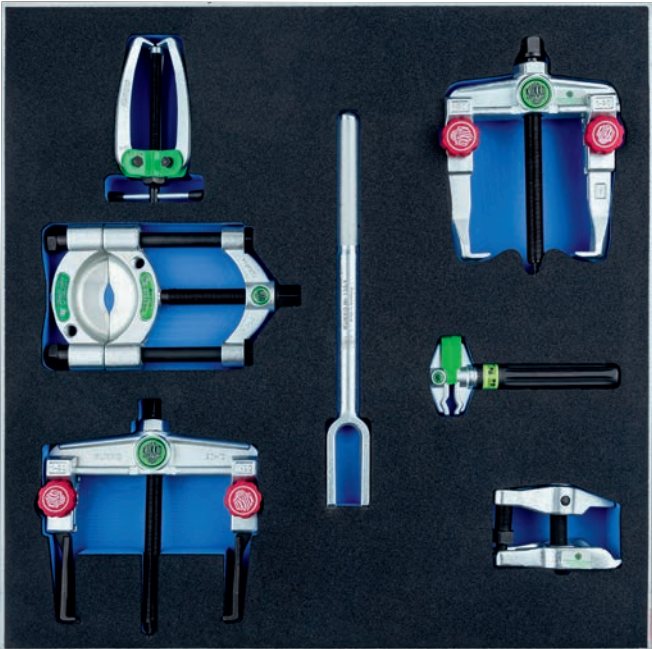

3D MODELS

We have our own database of 3D models of the tools in our offer.

FROM 1 UNIT

Personalized products in small quantities - as low as 1 unit!

PRODUCTS

LASER MARKING OF TOOLS

Do you want to effectively maintain order in your workshop? Do you aim to have better control over the tools entrusted to your employees? Do you find that searching for the right tools takes up most of your time, slowing down your work pace? Reach out to us! Bring your tools, and we will provide engraving services for you. You can also request tool engraving for items you select from our range. Indicate which products you want to mark, and we will carry out the service for you!

IDENTIFY THE TOOLS

Laser engraving allows quick identification of tools and creation of process descriptions.

LASER MARKING

Laser marking makes it easy to identify if tools are lost or stolen.

STRICT PERSONALIZATION

The tool is permanently marked with a unique serial number, description or tool index, barcode or logo.

INDIVIDUAL KITS

We will compile customized tools sets especially for you upon request.

BOX, TROLLEY, CAR, CONTAINER

Depending on the user's needs, their workshop is always with them

TOP QUALITY

In our tool sets, only the highest quality tools.

PRODUCTS

TOOL SETS
tool sets in cases and suitcases

In professionally equipped, modern workshops that meet health and safety requirements, what matters is not only the type of tools or accessories, but also how they are stored. We offer a wide range of tool cases and suitcases, which are dedicated to storing and transporting tools and workshop equipment.

TOOL
PROTECTION

Your tools will be protected from weather and corrosion.

FLOATING

Upon your request, we will assemble a set in a box that you won't sink. When it falls into the water, it will float on the surface.

DOUBLE-LAYERED

The use of two-color foam makes it so you can immediately see what's missing.

MOBILITY

Your tools sets always ready for action.

CUSTOM
CONFIGURATION

Only the tools you need and use are included.

ORDER

No more searching for tools, always perfect organization. Dedicate your time to work.

TOOLS TROLLEY

The tools trolley is a piece of equipment for a professional workshop or manufacturing company. Equipped with drawers of different sizes, it allows the user to arrange the tools with which he performs daily work in a functional and intuitive way. Tools trolleys are available in different sizes, configurations and color variants, which allows you to customize the trolley to suit different needs and requirements.

ACCESSORIES

A wide range of accessories will make your trolley a mobile workstation.

COLOR

Personalize your tool trolley according to the color scheme used in your company or in the color you like best.

VERSATILITY

We do not impose anything, about the size of the drawers, about the number of drawers, about the color of the trolley decide for yourself.

PRODUCTS

TOOL TROLLEY MMZW Mobile Modular Exchangeable Container

The Mobile Modular Exchangeable Container is a specially designed and prepared trolley with drawers used for storing tool sets, repair tool kits such as KOR, MES, spare parts, diagnostic sets, and all types of individual equipment for mechanics, electromechanics, and users responsible for the maintenance and operation of military equipment.

The Mobile Modular Exchangeable Container was designed and manufactured as part of the deliveries of UKWON containers to the Armed Forces

COMPATIBILITY

The product has been adapted for extending/retracting it into the installation of mobile workshops. Thanks to special guides, it is securely attached inside the workshop in an ergonomic manner, preventing unintentional extension during work.

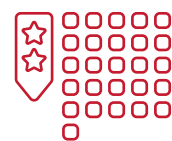

MOBILITY

Your tool kit in Mobile Modular Exchangeable Container trolley always where your body and your workshop are.

VERSATILITY

Size and number of drawers complete according to the needs of the User.

BODY ADAPTATIONS SARNA II and AUM 117 on the STAR 266 M2 Chassis

The bodies of modified mobile workshops in the SARNA II and AUM 117 bodies are a section of ARPOL Tools' co-implementation of the Polish Armed Forces' technical modernization plan, which has been implemented since 2010.

As part of the upgrade, ARPOL Tools has designed, built and completed nearly 1,000 Mobile Workshops for various types of the Armed Forces with tools and workshop equipment.

Mobile Workshops form the basis of mobile services for the Army's Sapper-Engineering, Chemical, Communications, Ordnance and Tank-Car Services.

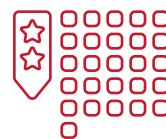

UNIFICATION

Nearly 1000 workshops equipped with the same type of body adaptation and identical tools.

IN THE ARMY SINCE 2013.

PRODUCTS

CONTAINER ADAPTATIONS

Containers have become an indispensable tool wherever stationary work is not possible. Thanks to their transportability, they are an excellent alternative to working in a stationary workshop.

AVAILABLE DIMENSIONS

We have 10', 20' and 40' containers.

MOBILE WORKSHOP

Your workstation always ready to go, the place of work depending on where you put the container.

MOBILITY

Your workshop always ready to go.

OVERLOADS

The installed adaptation can withstand an overload of up to 3G.

PRODUCTS

CONTAINER ADAPTATIONS ZNMP KOSODRZEWINA

The Construction Works Mechanization Set for Viaducts and Bridges, KOSODRZEWINA, is a concept that utilizes a container as a mobile storage facility equipped with all the necessary tools used in construction and engineering, housed within a 20-foot container. The set includes demolition tools such as jackhammers, construction tools like concrete cutters, a complete range of wood tools including saws and planers, and surveying tools like a theodolite.

The equipment of the set also includes power generators, allowing for simultaneous powering of all the devices inside the container without the need for external power supply.

An integral part of the KOSODRZEWINA Construction Works Mechanization Set is a band saw that allows for precise cutting and processing of wooden logs.

CONTAINER ADAPTATIONS

AWRU / WRUE

The Artillery Armament Repair Vehicle is designed for carrying out tasks related to field maintenance of armament and electronics, providing technical support, and supplying components and spare parts for the company-level firing module of the self-propelled mortar system codenamed RAK, as well as the self-propelled tracked howitzer system codenamed KRAB.

The Armament and Electronics Repair Workshop is designed to carry out tasks related to field maintenance of armament and electronics, providing technical support, and supplying components and spare parts for the division-level firing module of the self-propelled howitzer system codenamed REGINA, as well as the self-propelled tracked howitzer system on a tracked chassis codenamed KRAB.

The AWRU (Artillery Weapons Repair Unit) and WRUE (Workshop for Repair of Armament and Electronics) were constructed based on a 20-foot container. Modular construction was employed in the workshops, along with personalized sets of hand tools, tool sets for electronics, and an extensive array of soldering stations.

TRANSMET

RLM - mobile metrology laboratory

TRANSMET's Mobile Metrology Laboratory is a mobile laboratory designed for on-site metrological inspection of measuring instruments and evaluation of their suitability for use while maintaining standards and measurement consistency.

TRANSMET's RML consists of a metrology laboratory container (based on a 20-foot expandable container) and a technical and storage container based on a 20-foot container.

ARPOL Tools did the design and build-up of the two containers and delivered the tools in foam inserts packed in transport cases.

PRODUCTS

VEHICLE BODY ADAPTATIONS

ARPOL Tools offers a wide selection of customizable bodies for service vehicles, pick-up trucks and emergency vehicles. This allows you to find a car body that perfectly suits your requirements. The modularity of our bodies allows you to easily adapt the body to your changing needs, expand it with additional components, and transfer it to another vehicle when the vehicle is finished.

The car bodies offered by ARPOL are made of high-quality materials and provide maximum functionality, safety and comfort.

PRODUCTS

VEHICLE BODY ADAPTATIONS

Van body adaptations

With our modular vehicle body and racking systems, we can convert your empty van into a fully functional service vehicle. We offer full van conversion services, which can include modular floor and wall coverings, in-vehicle electrical systems and accessories in addition to the necessary vehicle body.

The lightweight body design provides greater payload capacity and lower fuel consumption. Fast and safe installation in service vehicles is due to the intelligent design of non-invasive modular floor and wall liners. These products are installed with a strong adhesive that works better than nuts and bolts. It also means there is no need to drill into the vehicle's body which eliminates the risk of corrosion.

MODULAR SYSTEMS

Short installation time body-work.

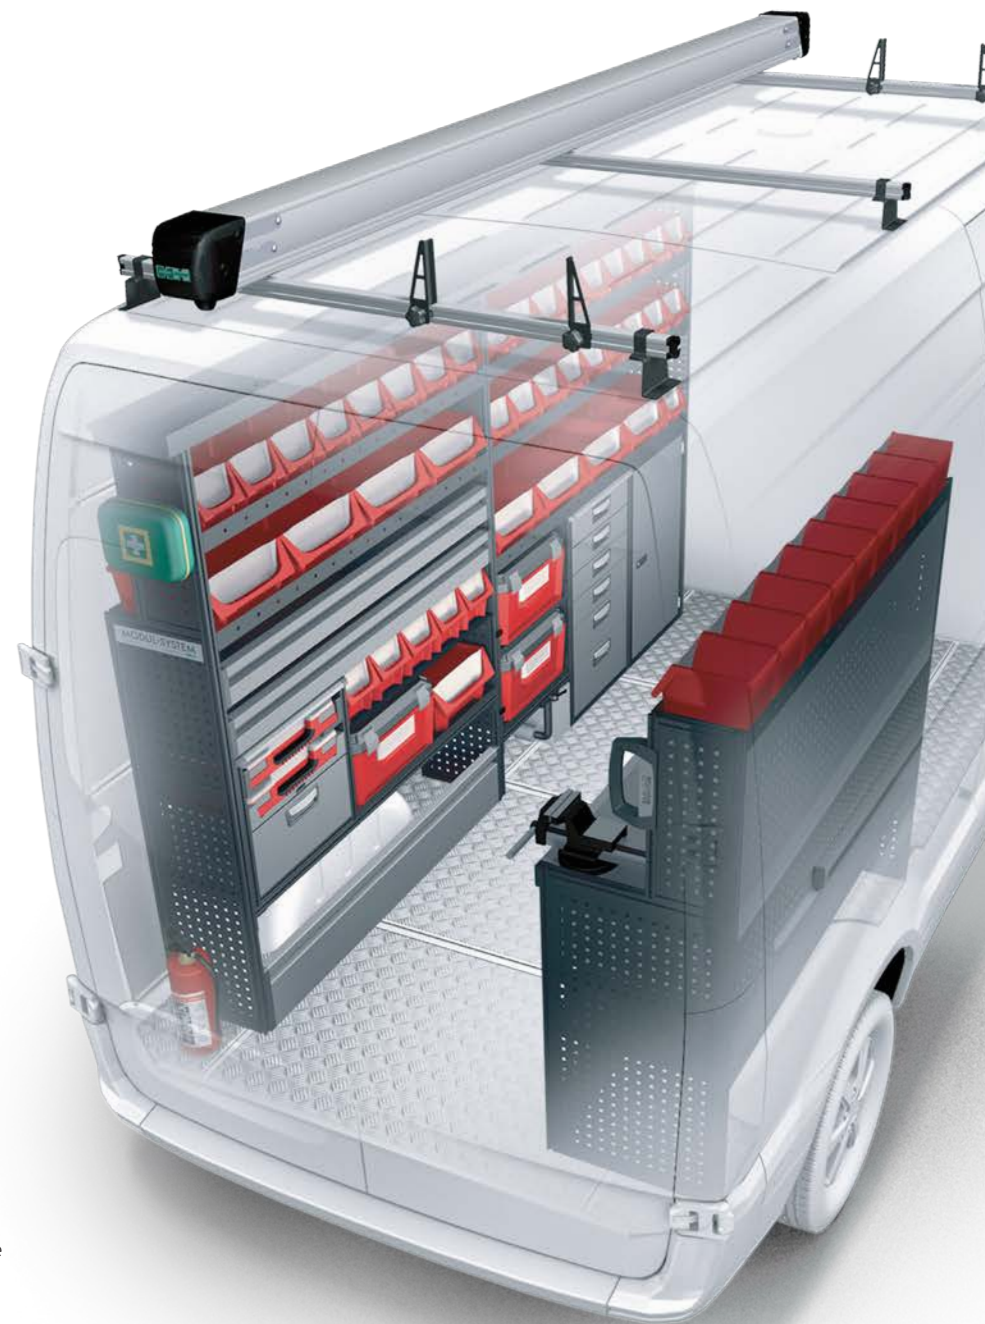

LIGHTWEIGHT CONSTRUCTION

Bodywork provides more payload or lower fuel consumption.

INCREASED FLEXIBILITY

Thanks to customized storage solutions in delivery vehicles.

PRODUCTS

VEHICLE BODY ADAPTATIONS

pick'up vehicle adaptations

Your pick'up can successfully become your working tool. As part of the adaptation of pick'up vehicles, we make technical reconnaissance vehicles, intervention vehicles or inspection vehicles

CABINET AND DRAWER INSTALLATION

We will design and install the bodywork in your vehicle. Drawers, cabinets, platforms, cases will be the basic tools of your mobile workshop.

HARD TOP

We will design and manufacture a bodywork for your pickup truck - an aluminum hardtop. We customize the height and shape according to Customer's needs.

LED LIGHTS

We install LED signal beams for service and emergency vehicles. Installation of signal lighting by our service technicians does not void the warranty.

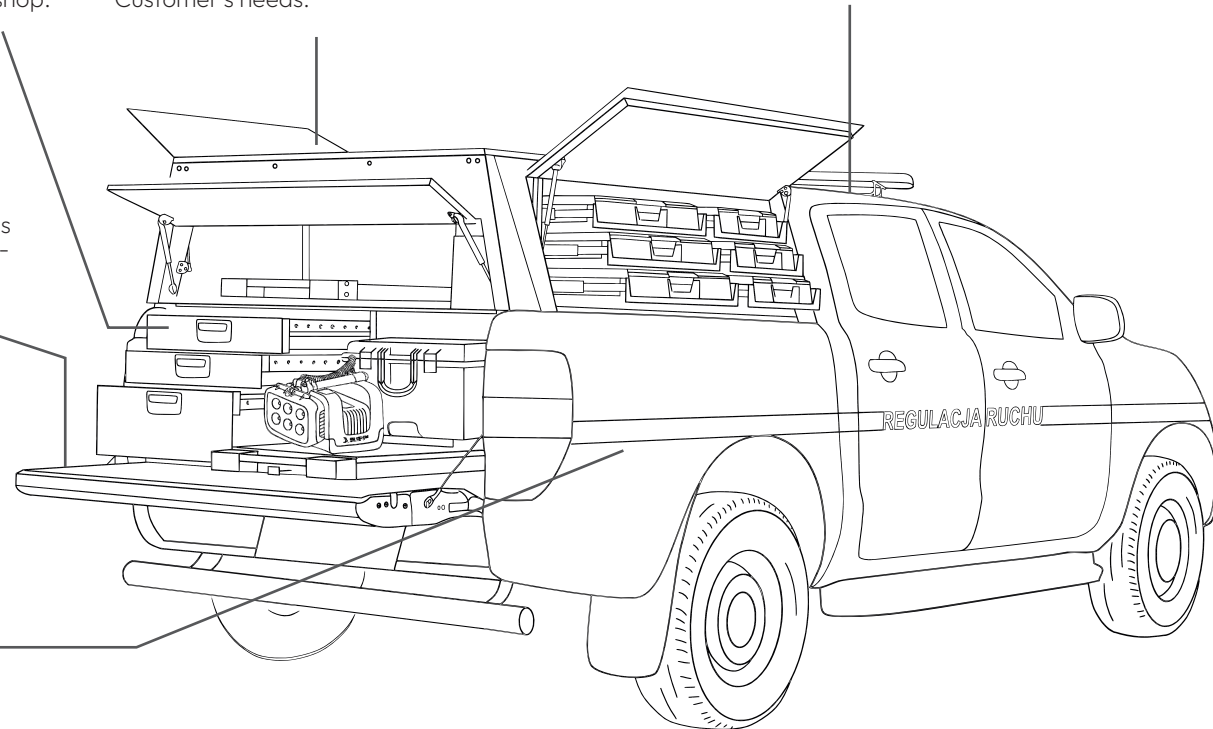

ACCESSORIES

As required, we equip service vehicles with a winch and all necessary accessories.

VEHICLE WRAPPING

We will manufacture a marketing label or mark it as an emergency vehicle. It is also possible to cover the entire vehicle with a protective film.

PRODUCTS

VEHICLE BODY ADAPTATIONS

Privileged vehicles

We adapt vehicles that help ensure public safety in daily operations - emergency vehicles.

We customize vehicles according to the requirements of the particular user and the tasks performed. As part of the service, we install LED lights mark the vehicle with the appropriate veneer, install radio and sound signaling. We carry out the required tests.

The built rescue vehicles are used on a daily basis by police, firefighters, the military, and mountain and water rescue.

PRODUKTY

GROUND REINFORCEMENT MATS

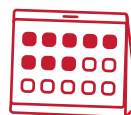

SCOBAMAT®

Ground reinforcement mats are used as ground reinforcement - temporary road, allow heavy wheeled and tracked vehicles to pass over difficult and uneven terrain.

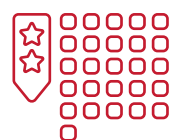

The specially formed profile of SCOBAMAT® sheets contributes to their flexibility, as well as the matter that the 2x4m sheets form a neat and stable stack for transport and storage.

The sheets stabilize soft and uneven terrain, creating a durable and stable surface on which public utility vehicles, emergency vehicles, aircraft and military vehicles can move without hindrance.

The set of Reinforcing Ground Matting comes with a set of necessary tools for handling and securing the mats are pins and fasteners for anchoring the mats, handling tools, a set of health and safety accessories and transport straps, among others.

PRODUCTS

GROUND REINFORCEMENT MATS

SCOBAMAT®

By making a ground reinforcement mat, its 2x4m sheets allow it to be used as a so-called infinite road. Thanks to the ability to move the last sheet to the front, a stable ground is obtained even in cases where the number of sheets you have is not sufficient for a given run.

SITE STABILIZATION

It creates a durable and stable surface on which special vehicles, military vehicles and aircraft can easily travel.

FLEXIBILITY

The special molded profile of the sheets contributes to their flexibility.

LIGHTWEIGHT

Only 48 kg of sheet allows two people to handle the mats.

EASY TO CLEAN

Thanks to the special profile, it only needs to be rinsed with water after use.

CONTAINER SUBSTRATE

Provides a stable foundation for containers.

RETURNING AIRCRAFT TO THE RUNWAY

It serves as a support to bring back aircraft that have been off the taxiway.

DIVERSIFIED USE

Use according to your needs.

RESISTANT TO WEATHERING AND AGING

The mat has been tested for weathering and aging.

DOES NOT REQUIRE A DEDICATED MEANS OF TRANSPORT

You do not need to provide a special means of transport or accessories. The mat will be moved by hand.

IN COOPERATION WITH SPECIALISTS

The mat was produced in cooperation with the Zurich - Kloten Airport Fire Department (ZRH).

PRODUCTS

TRACK MAINTENANCE TOOLS ANORTEC

Our track service tools are an indispensable piece of equipment for any user of tracked vehicles. They quickly and very safely allow the removal and installation of track links. The use of ANORTEC tools significantly reduces vehicle service time.

PRODUCTS

TRACK MAINTENANCE TOOLS ANORTEC

All of ANORTEC's equipment has been developed in close cooperation with the Armed Forces' technical services, and has therefore been closely tailored to specific needs.

A torsion bar extractor is a device that allows the removal of torsion bars easily regardless of the condition of the bar, even when it would be blocked by dry grease or rust. A track link tool is a specially designed and manufactured device for opening and closing the tracks of tanks and armored vehicles to repair, replace one link or the entire track.

TROUBLE-FREE
TRANSPORTATION

EASY
TO USE

In all conditions both field and workshop.

UNIVERSALITY

Applicable for most models of tracked vehicles on the market.
